

EVORA®
GRANITE

Evora® Granite is a maintenance-friendly material for the kitchen and bathroom. Proper use and regular cleaning is necessary to keep the worktop beautiful. With the tips below you can enjoy the worktop for years.

1 DAILY MAINTENANCE

Wipe your worktop daily with a dishcloth and a clean soapy water. Always rinse thoroughly with lukewarm water and dry your worktop with a clean, dry dishcloth or kitchen paper. This will absorb any remaining dirt and any soap and water residues.

Periodic maintenance

To easily remove dirt and traces of use, you can use Evora Granite Cleaner, a special granite cleaner. This product is available in the online shop. Always rinse well with lukewarm water and dry your worktop with a clean, dry dishtowel or kitchen paper.

Impregnation

Impregnation ensures that your worktop remains beautiful for a long time. It seals the pores and protects the worktop. Periodically test whether the protection is still optimal by placing a drop of water on the worktop. If this remains a drop, then your worktop is still sufficiently protected. If it flows out, you can apply the protector as indicated on the bottle.

Does the top have a matt * surface?

In the case of a matt surface, fat stains and fingerprints are visible earlier. Wipe off your worktop more often with a clean soapy water from some detergent. Always rinse

thoroughly with lukewarm water and dry your worktop with a clean, dry dishcloth or kitchen paper.

* *matt surface: finish*
Riverwashed, Lapato, Satinato,
Leather and Antique

2 SPECIFIC STAINS

FAT, COFFEE / TEA, RED WINE

(shiny or brown spots)
Let the Evora Granite Cleaner settle in for a while until the dirt starts to react. Then treat with a melamine sponge. Moisten it slightly and then squeeze it out for sufficient friction. Always rinse thoroughly with lukewarm water and dry your worktop with a clean, dry dishcloth or kitchen paper.

LIME STAINS

(dull white or brown spots)
Let the cleaning vinegar settle in for a while. Then treat with a melamine sponge. Moisten it slightly and then squeeze it out for sufficient friction. Always rinse thoroughly with lukewarm water and dry your worktop with kitchen paper. Make sure that cleaning vinegar does not come into contact with marble or bluestone.

Attention: NEVER use acidic liquids and aggressive cleaning agents for mable and Belgian bluestone. They damage the surface.

INK, PAINT OR NICOTINE

Remove ink, paint, nicotine or felt-tip pen stains with white spirit or turpentine. Always rinse thoroughly with lukewarm water and dry your worktop with a clean, dry dishcloth or kitchen paper.

3 STUBBORN STAINS AND METAL SCRATCHES

Use an abrasive sponge (with green nylon lace) and a liquid abrasive. Wet the sponge so that the abrasive is sufficiently diluted and a polished surface cannot be damaged. Always treat a larger surface, as intensive use on a small surface can lead to a difference in gloss. Always rinse thoroughly with lukewarm water and dry your worktop with a clean, dry dishcloth or kitchen paper. Have the stains, rings or scratches or metal stripes diminished, but not yet completely disappeared? Then repeat this process. This treatment is not for the daily maintenance of your worktop!

Note: NEVER use hard abrasives such as steel wool, sandpaper or diamond. They can permanently damage the worktop surface!

Never allow liquids to dry. Do not leave fats or foods on the worktop for an unnecessarily long time.

Hot pans can cause thermal shock. Always use a coaster with hot objects.

Never cut directly on your worktop, always use a cutting board.

NEVER use aggressive cleaning agents such as paint remover, brush-, metal- or oven cleaners, chlorine, sink unblockers or other chemicals!

At a surface with structure more dirt remains. Thorough rinsing with clean water and rubbing dry ensures that no dirt remains in the structure of the surface.

EVORA GRANITE CLEANER

Evora Granite Cleaner (art.no. 290084) is an impregnating and cleaning agent for the periodic maintenance of your granite worktop.
