

Fenix is a maintenance-friendly material for the kitchen and bathroom. Proper use and regular cleaning is necessary to keep the worktop beautiful. With the tips below you can enjoy the worktop for years.

1 DAILY MAINTENANCE

Wipe your worktop daily with a dishcloth and a clean soapy water. Always rinse thoroughly with lukewarm water and dry your worktop with a clean, dry dishcloth or kitchen paper. This will absorb any remaining dirt and any soap and water residues.

Periodic maintenance
To easily remove dirt and traces of use, you can also use the cleaning spray from the Fenix maintenance set. This product is available in the online shop. Always rinse well with lukewarm water and dry your top with a clean, dry dishcloth or kitchen paper.

2 SPECIFIC STAINS

FAT, COFFEE / TEA, RED WINE
(shiny or brown spots)
Let the Fenix cleaningspray or a clean soapy water of some detergent settle in for a while until the dirt starts to react. Then treat with a melamine sponge. Moisten it slightly and then squeeze it out for sufficient friction. Always rinse thoroughly with lukewarm water and dry your worktop with a clean, dry dishcloth or kitchen paper.

LIME STAINS
(dull white or brown spots)
Let the cleaning vinegar settle in for a while. Then treat with a melamine sponge. Moisten it slightly and then squeeze it out for sufficient friction. Always rinse thoroughly with lukewarm water and dry your worktop with a clean, dry dishcloth or kitchen paper. Make sure that cleaning vinegar does not come into contact with marble or bluestone.

INK, PAINT OR NICOTINE
Remove ink, paint, nicotine or felt-tip pen stains with white spirit or turpentine. Always rinse thoroughly with lukewarm water and dry your worktop with a clean, dry dishcloth or kitchen paper.

3 STUBBORN STAINS

Use a dry melamine sponge. The friction will remove the dirt. Always rinse thoroughly with lukewarm water and dry your top with a clean, dry dishcloth or kitchen paper. Have the stains or rings been reduced, but not yet completely removed? Then repeat this process. This treatment is not for the daily maintenance of your worktop!

Note: NEVER use hard abrasives such as steel wool, sandpaper or diamonds. They can permanently damage the worktop surface!

SMALL SCRATCHES

(small) scratches can be removed with a dry melamine sponge. The friction creates heat and this activates the thermal recovery.

Never allow liquids to dry. Do not leave fats or foods on the worktop for an unnecessarily long time.

Hot pans can cause burn stains. Always use a coaster with hot objects.

Never cut directly on your worktop, always use a cutting board.

NEVER use aggressive cleaning agents such as paint remover, brush-, metal- or oven cleaners, chlorine, sink unblockers or other chemicals!

FENIX NTM MAINTENANCE SET
The Fenix maintenance kit (item no.290129) contains a cleaning spray, a melamine sponge, a microfibre cloth and cleaning instructions. This product is from Fenix.
